

A God Proof: Paradigm Shift (Quantum Spirituality)

Science and spirituality are integrated. Consciousness is the ground of "being". To get a sense of existence outside of space-time and understand the connection of scripture to life in the worlds-heavens of reality, the following may help to understand it.

In the world, "Signals" are the means of communication within space and time. Meaning two objects that are in communication with each other are separate.

*Outside of space and time, the heavens-spiritual world, communication is instantaneous without signals.
This means means objects are essentially one.*

NOTE: "Signal" refers to any time-varying voltage, current, or electromagnetic wave that carries information.

Signal is an object used to transmit or convey information beyond the range of human voice.

The sound or image conveyed in telegraphy, telephony, radio, radar, or television.

A detectable physical quantity or impulse (such as a voltage, current, or magnetic field strength) by which messages or information can be transmitted.

John 17:21-23 **That they all may be one**; as thou, Father, art in me, and I in thee, that they also may be one in us: that the world may believe that thou hast sent me. And the glory which thou gavest me I have given them; that they may be one, even as we are one: I in them, and thou in me, that **they may be made perfect in one**; and that the world may know that thou hast sent me, and hast loved them, as thou hast loved me.

Non-locality is oneness and exists outside of space and time. (brotherhood) Non-locality occurs due to the phenomenon of entanglement, whereby particles that interact with each other become permanently correlated, or dependent on each other's states and properties, to the extent that they effectively lose their individuality and in many ways behave as a single entity.

In physics, the principle of locality states that an object is influenced directly only by its immediate surroundings. A theory that includes the principle of locality is said to be a "local theory". This is an alternative to the concept of instantaneous, or "non-local" action at a distance. The principle of locality implies that an event at one point cannot cause a simultaneous result at another point. Consciousness are waves of possibilities and probabilities not actualities. Senses and current awareness makes it seem like reality. We choose our own reality.

Quantum spirituality can be verified.
